

KNOWLEDGE IS EMPOWERING

UNDERSTANDING THE JEWISH - CANCER CONNECTION

WEDNESDAY
NOVEMBER 7, 2018
7:00 - 9:00 PM

TEMPLE SINAI
25 Canton St., Sharon, MA

Join us to learn from experts about Ashkenazi Jews' one-in-forty risk of inheriting a BRCA gene mutation. Having a BRCA gene mutation significantly increases one's risk of developing breast, ovarian, prostate and other cancers.

Panelists will discuss genetic counseling, the rationale for testing for BRCA gene mutations, managing cancer risk and resources available for those who carry BRCA gene mutations.

Individuals who have a BRCA gene mutation will share their stories followed by a Q&A session.

Lauren Corduck
Founder & Executive Director, Oneinforty
BRCA-positive ovarian cancer patient

Nadine Tung, MD
Dir., Cancer Genetics & Prevention Program
Dir., Breast Medical Oncology
Principal Investigator, BFOR Study
Beth Israel Deaconess Medical Center

SYMPOSIUM PANELISTS

Betty Cooperstein, LICSW
In private practice in
Brookline & Wayland, MA

Whitfield B. Growdon, MD
Center for Gynecologic Oncology
Massachusetts General Hospital

Melissa Rosen
Dir. of National Outreach
Sharsheret
